SUMMARY

IT professional with about 5 years of experience, including 4 years of enterprise network administration (Fortinet firewalls and VPN, Cisco routers and switches) and 4 years with Active Directory, Group Policy, and PowerShell, plus earlier healthcare office support. Moving into cybersecurity and seeking an entry-level SOC Analyst, IT Security, or IAM role. Handles about 30 tickets per day spanning account provisioning and offboarding, Microsoft 365 administration, chain-of-custody for sensitive equipment, and incident troubleshooting and escalation. Grounded in core security principles (CIA Triad, least privilege, defense-in-depth, risk management).

EXPERIENCE

Asset Control, Data System Services | 01/2023 – Present

- Handle about 30 tickets per day (roughly 600 per month) while keeping hardware and software asset records accurate and audit-ready.
- Configure and troubleshoot production Fortinet firewalls/VPN, Cisco routers and switches, VLANs, DNS, and DHCP.
- Provision and deprovision AD and Microsoft 365 accounts, including offboarding departing employees.
- Manage the secure IT hardware lifecycle, including chain-of-custody and third-party vendor repairs.
- Support software asset management (SAM) processes to maintain compliance and reduce audit risk.

Help Desk Technician, Data System Services | 08/2021 – 01/2023

- Triaged roughly 30 tickets daily (about 600 per month) as first-line support for technical, access-related, and security-adjacent incidents, escalating issues when needed.
- Provisioned user accounts, reset passwords, and configured permissions in Active Directory and Microsoft 365 to support identity and access management (IAM).
- Applied and maintained Group Policy settings and supported Windows Server and Windows 10/11 systems following security best practices.
- Troubleshot network connectivity issues, including firewall, VPN, TCP/IP, DNS, and DHCP problems, escalating complex issues when needed.
- Supported Windows and macOS end users, troubleshooting hardware, software, and account access issues.
- Documented incidents and resolutions to support trend analysis and continuous improvement.

Office Support Specialist, Visiting Physician Association | 06/2013 – 07/2021

- Installed patches and software updates to mitigate vulnerabilities and protect sensitive patient data.
- Supported desktop and laptop migrations with close attention to data security and system integrity.

SKILLS

Security Concepts: CIA Triad, least privilege, defense-in-depth, risk management
Identity and Access Management: Active Directory, Group Policy, Microsoft 365 admin, provisioning, offboarding, access control
Network Administration: Fortinet firewalls/VPN, Cisco routing/switching, Cisco VoIP, VLANs, TCP/IP, DNS, DHCP
Incident Support: Incident troubleshooting, escalation, documentation, reporting, remote support tools
Vulnerability Mitigation: Patch management, system hardening
Compliance and Asset Security: Chain-of-custody, SAM, audit readiness, compliance support
Programming and Scripting: PowerShell, Python, JavaScript, SQL, VBA
Systems and Tools: Windows Server, Windows desktop (20 years), macOS support (2+ years), advanced Excel

EDUCATION

B.S. in Information Technology, Minor in Business Administration | Wayne State University | 2020 – 2025
