Alex Smith

Cybersecurity | SOC Analyst (Tier 1) | IT Security | Identity and Access Management
Howell, MI (Remote) | 586-215-8932 | alexsmith308@yahoo.com | linkedin.com/in/alex-smith-aa963b199

SUMMARY

IT professional with about 5 years of help desk and IT asset control experience, plus earlier office support in healthcare, seeking an entry-level SOC Analyst, IT Security, or IAM role. Handles about 30 tickets per day spanning user provisioning, Active Directory and Microsoft 365 access control, chain-of-custody for sensitive equipment, and incident troubleshooting and escalation. Background in patch management, firewall and VPN troubleshooting, compliance support, and protecting sensitive patient data. Grounded in core security principles (CIA Triad, least privilege, defense-in-depth, risk management). B.S. in Information Technology from Wayne State University.

EXPERIENCE

Asset Control, Data System Services | 01/2023 – Present

- Handle about 30 tickets per day (roughly 600 per month) while keeping hardware and software asset records accurate and audit-ready.
- Manage the secure lifecycle of corporate IT hardware, ensuring accurate tracking, handling, and disposal.
- Maintain chain-of-custody for sensitive equipment while coordinating third-party vendor repairs.
- Support software asset management (SAM) processes to maintain compliance and reduce audit risk.

Help Desk Technician, Data System Services | 08/2021 – 01/2023

- Triaged roughly 30 tickets daily (about 600 per month) as first-line support for technical, access-related, and security-adjacent incidents, escalating issues when needed.
- Provisioned user accounts, reset passwords, and configured permissions in Active Directory and Microsoft 365 to support identity and access management (IAM).
- Applied and maintained Group Policy settings and supported Windows Server and Windows 10/11 systems following security best practices.
- Troubleshot network connectivity issues, including firewall, VPN, TCP/IP, DNS, and DHCP problems, escalating complex issues when needed.
- Supported Windows and macOS end users, troubleshooting hardware, software, and account access issues.
- Documented incidents and resolutions to support trend analysis and continuous improvement.

Office Support Specialist, Visiting Physician Association | 06/2013 – 07/2021

- Installed patches and software updates to mitigate vulnerabilities and protect sensitive patient data.
- Supported desktop and laptop migrations with close attention to data security and system integrity.

SKILLS

Security Concepts: CIA Triad, least privilege, defense-in-depth, risk management
Identity and Access Management: Active Directory, Group Policy, Microsoft 365 administration, user provisioning, permissions and access control
Incident Support: Incident troubleshooting, escalation, documentation, reporting, remote support tools
Vulnerability Mitigation: Patch management, system hardening
Compliance and Asset Security: Chain-of-custody, software asset management (SAM), audit readiness, compliance support
Networking: TCP/IP, DNS, DHCP, firewall and VPN troubleshooting
Programming and Scripting: Python, JavaScript, SQL, VBA
Systems and Tools: Windows Server, Windows 10/11, macOS end-user support, advanced Excel

EDUCATION

B.S. in Information Technology, Minor in Business Administration | Wayne State University | 2020 – 2025
